PUBLISHER'S EXPERT software CHOICE

Personal Publisher

Desktop Publishing Made Simple.

Personal Publisher

Personal Publisher gives you the capabilities to enter the world of desktop publishing now. You can create newsletters, flyers, ads, awards, presentations, cards, announcements and more.

With Personal Publisher you can combine text, graphics and page layout so your documents will look like they were created by a professional graphic designer.

Text
The built-in word processor is loaded with features like move blocks, copy, cut and paste. And you can select different type styles and sizes.

Graphics
You don't have to be an artist to create sharp looking pictures for your pages. Personal Publisher comes with plenty of clip art pictures on disk.

Page Layout
Your pages can have multiple columns. And there's plenty of style sheets already designed for you, on disk. Just add text and graphics and you've got an attention grabbing page, ready to print.

Personal Publisher is easy to use because the menus are right on screen all the time. An illustrated manual takes you step-by-step through creating a page, with lots of examples and tips. So you don't need to know anything about art, layout or design.

System requirements: IBM PC, Tandy and compatibles require 512K, DOS 2.1 or higher, 1 disk drive, supports CGA and Hercules graphics; Apple IIe, IIc, IIGS, and compatibles, 128K ROM, ProDOS; Commodore 64 or 128, GEOS version 1.2 or 1.3.
